

www.Carcinogenesis.com

Hello,

Greetings. As a Founding Editor-in-Chief of the Journal of Carcinogenesis, I am very excited to invite you to submit your next manuscript to our journal. The Journal of Carcinogenesis is making significant progress in its efforts to publish world class research and make it accessible to everyone interested under an Open Access model.

Journal of Carcinogenesis is a premier peer reviewed journal with a calculated impact factor of 2.5 and is one of the top 50% of cancer research journals. **Journal of Carcinogenesis** considers manuscripts in diverse areas related to carcinogenesis, carcinoprevention and related disciplines. Primary areas of interest to the journal include: Physical and chemical carcinogenesis and mutagenesis; toxicology and toxicogenomics, processes influencing or modulating carcinogenesis, such as DNA repair, hormonal carcinogenesis, genetics, nutrition and metabolism of carcinogens; the mechanism of action of carcinogens and modulating agents; epidemiological studies, the formation, detection, identification and quantification of environmental carcinogens. If you have any suggestion to include other topics, please write to me.

Some features of the journals are

- Edited by International editorial board
- Double blind unbiased peer review of manuscripts
- Rapid decision on the manuscripts
- Indexed in PubMed and many bibliographic indices
- Immediate online publishing upon acceptance
- Globally accessible and Easy to read & cite
- Authors retain the copyright of their articles

Please write me directly, if you have any suggestions or like to join the editorial board as a member or as a rapid reviewer. I look forward to hearing from you.

Sincerely,

Gopala Kovvali

Journal of Carcinogenesis

Gopala Kovvali M.Phil.,Ph.D.

Editor-in-Chief and Executive Editor

Adjunct Professor, Graduate School of Biomedical Sciences, UNTHSC, Fort Worth, TX
